

DORIAN LOVICH

Full-Stack Software Engineer | Applied AI (LLMs, RAG, Agents) & DevOps

San Diego, CA | dorian@dorianlovichi.com | dorianlovichi.com | linkedin.com/in/dorian-lovichi | github.com/dorianlovichi

SUMMARY

Full-stack software engineer with 2 years of production experience at GoodBarber, a SaaS platform powering 30,000+ mobile apps and PWAs (Angular/TypeScript frontend, PHP/Phalcon backend). Builds applied AI systems in parallel as a freelancer: RAG and GraphRAG pipelines, multi-agent LangChain orchestration, and containerized deployments on Kubernetes. Winner of the University of Corsica Innovation Challenge 2025.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, PHP, SQL

Applied AI: LangChain, LLMs, RAG, GraphRAG, AI agents, multi-agent orchestration, embeddings, vector search, prompt optimization

Frontend: Angular, React, React Native, PWA, Nx monorepo

Backend & Data: FastAPI, Node.js, Express, Phalcon, REST APIs, PostgreSQL, MongoDB

DevOps & Cloud: Docker, Kubernetes, CI/CD, Nginx, Linux, cloud architecture

Practices: Design patterns, Git, code review, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer (Apprenticeship) — GoodBarber | Ajaccio, France | Sep 2024 – Aug 2026

SaaS platform for building native mobile apps and Progressive Web Apps

- Architected a configuration-driven Server-Driven UI rendering layer and designed the supporting REST endpoints in PHP (Phalcon), enabling layouts to ship without app redeployment across 30,000+ platform-generated apps that record 25,000+ downloads per day across 152 countries.
- Developed frontend features in Angular/TypeScript within an Nx monorepo for the platform's generated PWAs and its editor back-office, a product available in 16 languages and used by customers worldwide, with published apps localized in 33 languages.
- Delivered features end to end, from specification to production release, through CI pipelines, peer code reviews, and close collaboration with the product team on a platform serving several apps with over a million users each.

AI & Full-Stack Developer — Freelance | Ajaccio, France | Feb 2026 – Present

- Delivered a client website end to end, from design and development to hosting, domain setup, and ongoing support, for a drone services business (aghjone-drone-zigliara.dorianlovichi.com).
- Advised clients on cloud architecture, conducted technical audits of existing systems, and delivered technical training.

Application Developer (Internship) — Collectivité de Corse | Ajaccio, France | Apr – May 2023

- Built an application for the regional government of Corsica to help the public discover the island's territory, independently owning the assigned scope.

PROJECTS

Agentic GraphRAG | *Python, LangChain, Knowledge Graph, Vector Search*

- Engineered a document research system combining knowledge-graph traversal with vector retrieval to answer multi-hop questions that standard RAG struggles with, orchestrating specialized LangChain agents for query planning, retrieval, and synthesis.
- Combined graph-based and semantic retrieval so agents could ground answers in both entity relationships and document content.

Precision Agriculture Platform — Innovation Challenge Winner 2025 | *Satellite, Drone & IoT Sensors*

- Designed a real-time crop monitoring solution fusing satellite imagery, drone data, and field sensors to drive irrigation, disease prevention, and automated alerts; won the University of Corsica Innovation Challenge 2025.

DL-Refine — AI Chatbot with Prompt Optimization | *Node.js, Express, LLMs, Kubernetes*

- Built a bilingual English/French chatbot with automatic prompt optimization and three modes (expert, plain-language, translator), containerized and deployed on Kubernetes. dl-refine.dorianlovichi.com

IMPA — Internal Newsroom Tool (Hackathon) | *Kubernetes, Docker*

- Took an internal tool for a newspaper from requirements gathering through data modeling, UI, and Kubernetes deployment, shipping a working product within a 2-day hackathon. impa.dorianlovichi.com

EverGoTrips — Travel App | *React, React Native, PWA, REST API*

- Developed a cross-platform travel app and PWA with an offline mode, backed by a dedicated REST API. evergotrips.dorianlovichi.com

EDUCATION & LANGUAGES

M.S., Full-Stack Web & Mobile Development — High Honors | Università di Corsica | 2024 – 2026

B.S., Engineering Science — Honors | Università di Corsica | 2023 – 2024

Associate Degree, Multimedia & Web Development — Honors | Università di Corsica | 2021 – 2023

Academic & Language Immersion Program | San Diego State University | Fall 2026

Languages: French (native) | English (full professional proficiency, B2/C1) | Corsican (professional) | Spanish (elementary)

Work Authorization: EU citizen; will require U.S. employment visa sponsorship
